**AIRMARK COMPONENTS ANNOUNCES
ACQUISITION OF GODFREY AEROSPACE
U.S. HEAT TRANSFER OPERATION**

Ft. Lauderdale, Florida (March 8, 2001) - Airmark Components announced today that it has acquired the assets consisting of the heat transfer repair and overhaul facility formerly owned by Godfrey Aerospace in Piqua, Ohio.

Kirk Alexander, Vice-President and General Manager of Airmark Components, said, "This transaction represents another important step in increasing our capabilities in serving our regional airline and corporate clientele and will expedite the company's strategy to expand its product offerings." Mr. Alexander further noted that since acquiring the company from Allied-Signal Aerospace in late 1998, the firm has quadrupled its overhaul capabilities and repair technicians.

Brian Nee, Director of Sales and Marketing, added, "Because Godfrey's Ohio facility served as the authorized North American service center for HS Marston Aerospace Ltd., a leading producer of heat transfer components for regional and corporate aircraft, this acquisition will further enhance our expertise in the repair and overhaul of regional and corporate heat exchangers, fuel heaters and oil coolers."

Terms of the transaction were not disclosed.

Airmark Components is a leading FAA/JAA certificated repair station specializing in the repair and overhaul of pneumatic and heat transfer components. Established in 1985, the company provides repair and overhaul services to many of the world's leading airlines, corporate flight departments, and the U.S. Air Force.
